

## Sharad Jones, PhD

Dr. Sharad Jones is a Senior Consultant at Strategies By Design and holds the position of Professional Practice Assistant Professor of Data Analytics and Information Systems in the Huntsman School of Business at Utah State University. Sharad earned his PhD in Statistics in 2021 at USU, where his dissertation was focused on Conditional Generative Adversarial Networks for multimodal scene generation. His current research interests are in multimodal Neural Networks, Ethical AI, and Transformers.

Sharad's dissertation research was done in collaboration with Maxar Technologies, a space technology company, where he was employed as a Data Scientist from 2018-2021. Prior to his PhD, he worked as a Data Scientist for Carvana, an online used car retailer, from 2014-2017. Following his PhD, he worked as a Senior Data Scientist for Striveworks, a government contractor focused on developing an operational data science platform. With his extensive experience in both academia and industry, Dr. Jones specializes in teaching Machine Learning, AI, and Ethical Data Science. He plays a crucial role in guiding leaders through the new world of AI and Disruptive Technology.
